

Name _____

Class _____

Student Worksheet

Thought-starter: What excites you about the future?

Think Pair Share

You will now complete a Think Pair Share activity to develop definitions for some or all of the following terms:

- Climate change
- Greenhouse gas
- Carbon dioxide
- Carbon sequestration
- Sustainability

Begin by adding the term you are defining into Column A of the table below. You can then record your own ideas for your terms in Column B. Once complete, you can team up with a classmate and discuss your ideas, adding new thoughts to Column C.

Column A (Term)	Column B (Your Ideas)	Column C (Group Ideas)

Reflection

You will now be selecting one thing you are personally concerned about for the future and thinking about why this is a concern and what the solution might be.

You can create either:

- A written piece.
- An image or graphic.
- An audio or video recording.

In your piece you need to answer the following:

- What is my concern?
- Why is this a concern for me?
- What is one possible solution?
- Who is responsible for this solution and why?
