

# Station Cards

Print out these cards and place them at each station with sticky notes for student discussion.

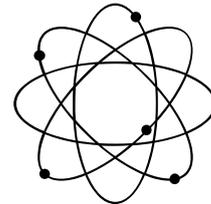

## Station 1: Early human interaction with nature

How did early humans rely on nature for survival, and how did they work in harmony with it?

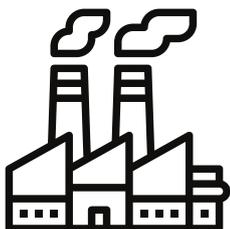

## Station 2: The role of science and culture

How has science changed our understanding of nature, and how does culture shape our relationship with the environment?

## Station 3: Industrialisation and technology

How has industrialisation and technological advancement impacted our connection with nature?

## Station 4: Stewards to exploiters

How have we shifted from being stewards of the earth to sometimes exploiting nature?
