Teacher content information

Creating a safe learning environment

Creating a supportive, caring and respectful learning environment is key to the successful delivery of this lesson. Promote a sense of belonging and respect in your classroom at the onset of this lesson to establish an environment that will nurture and support the psychological needs of all students. Offering emotional support in a sensitive manner to the whole class as well as individuals identified as at-risk will be a priority. Some students may decide

- to continue to participate or not
- to work on alternative content elsewhere
- elect to discreetly take breaks if/when needed
- want to debrief or access appropriate support after the lesson.

Content

The **Future Council** feature documentary takes eight kids on the ultimate school excursion, a road trip across Europe to challenge powerful leaders and find solutions to our greatest ecological challenges. Prior to teaching this lesson, it is recommended that you watch *Future Council* with your students. You can check out the Tuning into the Film lesson created by Regenerators [here](#).

Want to get involved in the future Council?

Inspired by the film, and together with a cohort of young people from around the world, they are further expanding the Future Council. The Future Council is a global movement of empowered young leaders inspiring and collaborating with businesses and institutions to create a better future. The Future Council is being embedded into businesses, schools and institutions, unlocking wonder and creativity, and giving permission to dream. Think of the Future Council as a moral compass within an organisation. [Sign up](#) to register your interest and hear about opportunities as we move towards officially launching the Future Council as a global youth-led movement later in 2025.

The themes covered in this lesson relate to our [Regenerative Farming Teaching Resources](#). In these lessons, you will explore case studies, plan regenerative gardens, and delve into futuristic farming in space. Check them out!

These lessons have been created in partnership with

Future Council and Regen Studios
